COMPANY PROFILE

www.anyaco.net

Company

Summary

Anya is a full-fledged software development and programming team that started its work in 2017 and tried to develop its products in the best way.

In these years, we have tried to gain many experiences in the fields of Games, EdTech, FinTech, Social and Database by creating a diverse resume in specialties such as design, development and project management.

Vision and Mission

Becoming the best software development company in the Middle East by Anya's tenth birthday

Cooperation with pioneercompanies to create innovative software products

Product
Plan

Outsource building your MVP to us, with complete oversight

Phase 0 - Product Concept

- Two to six hours of brainstorming sessions with the founders
- One to three sessions
- Our senior PM, designer and developer attending
- A written report on requirements as a blueprint
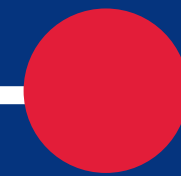

Phase 1 - Analysis and Design

- Based on our work in Phase 0, to plan and budget
- A team of PM, designer and developer(s) work with the founders to design your product, from the early concept to the data structure, UI/UX and flow
- Two to six weeks

Product
Plan

Phase 2 - Implementation

- Managed team
- Size based on your budget and planning in Phase 1
- Agile methodology
- Continuous Integration and Delivery
- Continuous alpha-testing, feedback, design improvement and bug fixing
- Weekly progress reports with the team leaders

Phase 3 - Post-Release

- Use the same developers who built the product
- Choose one of the offers or managed models, for:
- Support
- Continuous improvements
- Adding new features
